ADVANCED CALIBRATION AND DIAGNOSTICS

ADAS Calibration & Advanced Diagnostics

A simple solution for ADAS calibration

The evolution of the automotive market and related technology lead to an increase in driver assistance systems (ADAS) that are increasingly and precise, which support the driver in certain circumstances by increasing driving safety.

However, when an intervention on the ADAS systems of a vehicle is required, **it is fundamental to have an adequate tool for performing the correct repair** and therefore to maintain the functionality of the systems.

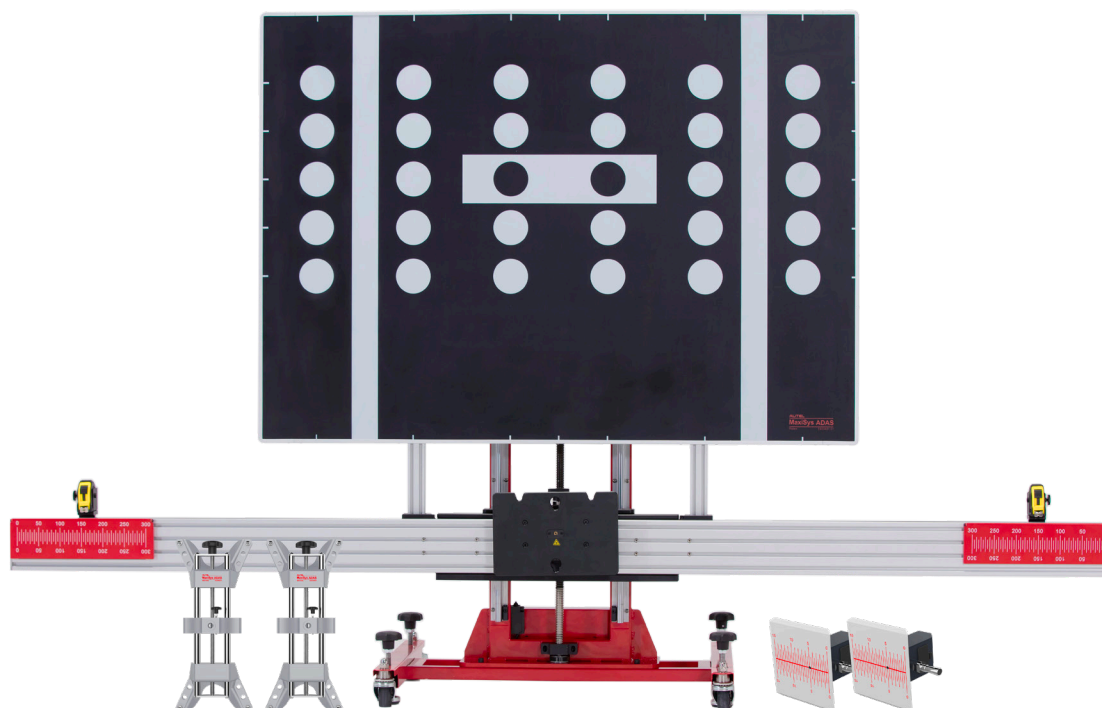

AUTEL has developed the MaxiSys ADAS line capable of supporting the calibration of these systems.

The MaxiSys ADAS line consists of two fundamental parts: the software and the frame.

The MaxiSys ADAS Software, which can be installed on any tool of the MaxiSys line (except MaxiSys906 and MaxiSys CV), is a

step-by-step guided procedure the calibration process (from the positioning of the wheel clamp, to the analysis of the calibration) and allows you to complete the most accurate calibration procedures on every brand without the help of the vehicle user manual. The **MaxiSys ADAS package covers a wide range of vehicles** and systems and includes: main panel, wheel clamps and centering laser.

The patterns are divided according to the vehicle brand and the type of calibration, to satisfy the wider needs of the car repairer.

MAXISYS ADAS FRAME

PART N. MS906ULTRA

accessories on page 27

The MaxiSys ADAS calibration system allows easy, fast and accurate calibration. Thanks to the ADAS software, you will be guided in the procedures through complete instructions and explanatory images.

The optional panels, divided by models between Europe, Asia and America, allow complete coverage and calibration of ACC, LDW, NVS, BSD, AVM, RCW and HUD systems.

Autel offers Basic Kit and Full Kit packages which include calibration panels of different brands and models.

ADAS Frame cannot be sold individually.

BASIC KIT p. 47

Allows lane keeping system calibration for VAG and Mercedes Benz and Bosch radar calibration.

FULL KIT p. 48

In addition to the Basic Kit panels, it allows the calibration of the lane keeping system for Honda, Toyota, Lexus, Hyundai, Kia, Nissan, Mercedes, Kia, Jeep, Fiat, PSA and Alfa Romeo.

INCLUDES:

24 months Warranty

FEATURES:

Precise calibrations
Manual and automatic measuring
Adjustable panels
ADAS All Systems Diagnostics

WARNING:

The BASIC KIT and FULL KIT packages **do not include the diagnostic tool**. To use the MaxiSys ADAS systems it is necessary to have a diagnostic tool from the MaxiSys line.

TECHNICAL SPECIFICATIONS

Dimensions	251 x 71.4 x 148-210.5 cm
Weight	152 kg
Panel dimensions	136 x 96 cm
Laser classification	class 2
Certifications	CE, FCC, RoHS

MA600 FRAME

PART N. MA600

The new ADAS MA600 system is the ideal tool for body shops and glass replacement centers.

The MA600 performs front camera calibrations after windshield replacement. The brand new structure is adjustable and can be easily disassembled for its transport. The high quality materials used guarantee the maximum performance both in the workshop and outside, thus allowing precise and professional calibrations.

MA600 FULL p. 51

The MA600FULL package includes 22 panels and allows the calibration of the lane keeping systems cameras.

TECHNICAL SPECIFICATIONS
